

Logility® Digital Supply Chain Platform Vendor Management

Logility's vendor management solution improves speed to market and responsiveness to disruptions in the supply chain.

Logility's vendor management solution enables your demand-driven, agile supply chain and helps you meet the challenges of a rapidly changing sourcing environment. In addition, the application ensures that production and logistics information is shared amongst all members of your extended global supply chain network, including retailers, brands, vendors, manufacturers, suppliers, contractors, agents, brokers, carriers and freight forwarders.

Bring All Parties Together

Real-time vendor visibility enables full collaboration with your vendor ecosystem. This promotes discovery, evaluation and the communication of issues, turning your toughest business challenges into opportunities.

Logility's vendor management solution empowers your connected enterprise by allowing you to broadcast information across your network to optimize product lead time and distribution, maximizing revenue and profit. Our vendor management solution is user-configurable to meet customer requirements and integrates with all applications across your connected enterprise.

Benefits:

Compress purchasing lead times

Position raw materials and semi-finished goods for planned production cycles or series

Improve order fulfillment rates

Balance production capacity and product demand

Shrink markdowns and close-outs

Apply "postponement" techniques to adjust work-in-process inventories

Cut unanticipated airfreight expenses

Ensure on-time deliveries from global production facilities

Reduce product defects

Manage on-site quality audits and quickly make needed corrections

Logility's vendor management solution creates visibility of production and logistics data for all members across your extended supply chain network, ensuring all trading partners are aligned with the latest information, from retailers to freight forwarders.

Logility® Digital Supply Chain Platform

Vendor Management

Lead time optimization Vendor management offers capacity allocations, raw material drawdowns, just-in-time (JIT) manufacturing support and retail sales performance alerts.

Vendor enablement and tracking Create and maintain precise supplier profiling and performance analyses to drive sourcing decisions; provide onboarding support, expiry notifications; use geolocation tools for inspection scheduling.

Comprehensive purchasing support Use online PO delivery and acknowledgements, maintain an audit trail of all revisions, attachments and acceptances, and receive WIP updates to track production status.

Quality control Vendor management offers in-line and final measurements plus packing accuracy audits, automated Corrective Action Plans, trend analysis by date range, factory, item, material, etc. and a mobile app for on-site audits.

Global logistics Our solution offers shipment creation and tracking to final destination, inbound documentation and electronic ASN creation, real-time calculation of actual cost versus estimated cost variances and Importer Security Filing creation.

Workflow calendars Includes templates with dependencies and critical path support, system-generated "To-Do" list at user or team level and timelines based on durations and target dates.

Global collaboration Collaborate on any system object and create escalation rules based on severity. Includes a dashboard to view current or historical discussions, supports file attachments.

Exceptions dashboard Real-time, user-defined alerts highlight potential problems; management-by-exception is supported using if/then statements with full drill-down support to view the details of each exception.

Custom reporting Vendor management provides real-time, on-demand reporting and the ability to create and share views with other users and export report data to popular tools. Also supports custom report writing using SQL Reporting Services.

About Logility

Accelerating the sustainable digital supply chain, Logility helps companies seize new opportunities, sense and respond to changing market dynamics and more profitably manage their complex global businesses. The Logility® Digital Supply Chain Platform leverages an innovative blend of artificial intelligence (AI) and advanced analytics to automate planning, accelerate cycle times, increase precision, improve operating performance, break down business silos and deliver greater visibility. Logility is a wholly owned subsidiary of American Software, Inc. (NASDAQ: AMSWA).
